Art Unit: 1761

The finality of the rejection of the last Office action is withdrawn.

Claims 16 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-15, 17, and 19-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Leo et al (US Patent No. 5560821).

Leo et al teach a method for treating wastewater using an antibacterial composition containing ammonium sulfate, copper sulfate, and sulfuric acid mixed and diluted with water (see entire patent, especially column 5, lines 5-26).

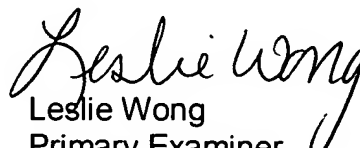

It is noted that the claims are not specific for food products. It is suggested that Applicant amend the claims to specifically claim food products. It is further noted that treated wastewater can be used to irrigate crops.
